RapidBILL

Airport Billing System

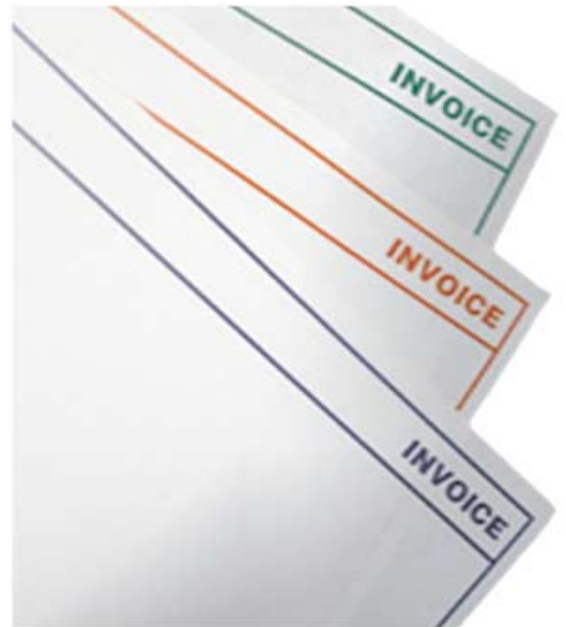

RapidBILL is a solution dedicated to the airport's billing needs; it secures accurate billing with unlimited settings and automatization. This module of the RapidAIMS AODB provides the market's most efficient and powerful billing system.

Powerful and User Friendly Billing Tool

- Capable of incorporating unlimited billing rules sets
- User-friendly and very customizable GUIs
- Customize each airport revenue stream

Real-Time Information

- Fits into the information system of the airport by receiving upstream data like flight information or management information
- Automatically processes airline messages (movements, loads, etc...) and then matches them to the appropriate flights and produces relevant billing and reports

One-Stop Management

Allows for one-time and recurring events such as:

Tenant - Leasing - Procurement
Property - Plant - Equipment
Activity Statistics - Human Resources
Inventory - etc...

Electronic Invoices

Internet publishing for customer and intra-airport reporting

Issues invoices in .pdf format

Store invoices on any server in the airport network

Accounting Integration

Interfaces with all standard accounting systems on the market

Reconcile any invoice activity with all accounting components
